

A DUCTLESS SYSTEM THAT GIVES YOU MORE.

Our best ductless system's engineering saves energy and money.

42

SEER Rating

high efficiency means reduced energy costs

15

HSPF Rating

more efficient winter heating, too

Relative Humidity Sensor

Built-in Occupancy Sensor

Products so hot, they're cool.

Since 1914, we've been delivering on our promise to create sensible, affordable products that do what you need them to do, period. It's the reason you come to us, because you need reliable heating and cooling for your home – a cost-effective system engineered to keep you comfortable, season after season.

Homeowners who choose Payne Heating & Cooling products are delighted in their decision. We know this because we have over 100 years of experience building a brand that stands for dependable products at the best possible price. When you choose Payne products, you're getting more than just a name. You're getting attractive, affordable products that work, including the latest technology that ensures they work smarter, not harder.

Payne maintains a simple line of highly efficient, superior quality products such as air conditioners, gas furnaces, heat pumps, indoor coils, duct-free splits and small packaged products. Homeowners who want dependable heating and cooling systems at a reasonable price turn to Payne. With more than 400 distributor locations in the United States and Canada, we have the right products distributed at the right place, sold at the right price and available right now.

When it's time to invest in your home's HVAC system, avoid the pain that comes with choosing an inferior product or dealer. Trust Payne to give you the right stuff.

Payne's Ductless High Wall system has the efficiency and technology to optimize the comfort of any home, and we have the experience and reputation to make sure you get your money's worth (along with a little "wow" factor, too). More efficient, less invasive: check out our best ductless unit's features.

-22°F Low Ambient Operation

ideal for winter performance in colder climates during colder parts of the year

122°F High Ambient Operation

keeps you cool even in the hottest environments
